

Why use the WSN stat system?

- Easy interface, can be done from any computer via a web-browser
- No equipment or software to purchase or install
- It is absolutely FREE!!
- It is the same login information and system by which coaches vote in the Coaches Poll on our site; get your area more representation in the poll
- Many coaches are already familiar with the system from entering team stats or voting in the Coaches Poll
- We are the #1 source for high school sports in the state of Wisconsin; your players will get the statewide recognition and exposure they deserve
- Fully customizable; see something you'd like adjusted, we're happy to oblige
- We maintain positive relationships with a number of media outlets, who often use our site for story ideas, gathering information for all-area teams, and selecting AP all-state honors
- College coaches use our site as a reference and to gather information; get your kids the most exposure and give them the best chance to succeed
- We tabulate everything, including per game averages, total season stats, conference only stats, and more! Just enter your stats after each game and everything else is done for you
- An "Email Box Score" feature that allows you to enter stats once and with one click send them to as many media outlets, AD's, parents, and whoever else you choose as you'd like
- We are here to assist you. As many have seen, we are available any time to help, including nights and weekends

What we ask of you (the conference) and the coaches:

- Coach names and emails to create accounts for those that do not have one yet
- Make it a requirement of coaches to use our system
- For coaches to enter stats at the earliest convenience after games
- We are not asking for any kind of binding contract, just a mutual understanding
